

# Professional, Technical, and IT Services

## Risk Management Services

*“There are risks and costs to a program of action, but they are far less than the long-range risks and costs of comfortable inaction.”*

*–President John F. Kennedy*

### Why Risk Management?

Our 21 years of experience shows that a formal risk management program is the cornerstone that bears the burden of success for virtually all other management actions. Those that practice continuous risk management reliably achieve greater success in delivering quality products and services on time and within budget than those that do not. Our expert risk management services are based on proven best practices and can be drawn upon to establish a practical and sustainable risk management program that will help you reach your business objectives.

### Our Products and Services:

We work hand-in-hand with you and your team to formulate a tailored policy, plan, and/or process that is right for you. These key elements together with top-down commitment represent the foundation for continuous and formal risk management (Figure1)

We also provide various risk management related products & services.

- ✓ Risk Policy, Plan, & Process Development
- ✓ Independent Project Risk Assessments
- ✓ Information Assurance & Security Assessments
- ✓ Consulting & Staff Augmentation
- ✓ Risk Radar & Risk Radar Enterprise

### Our Credentials:

- ✓ More than two decades of “in the trenches” Risk Management experience
- ✓ We apply the only ISO 9001:2000 Registered Risk Assessment Process specifically for IT programs in the U.S.
- ✓ Conducted 300+ Independent Risk Assessments of government and commercial organizations and programs
- ✓ Perform Information Assurance & Security Assessments for Federal clients
- ✓ Based on IEEE 1540, ISO 16085, NIST 800-30 and other Federal and commercial standards

**Risk Radar Enterprise®**

Our easy-to-use Risk Radar Enterprise® (RRE) risk management web application enables effective bottom up and top down risk communication inside and outside your organization. This scalable and adaptable tool enables managers and their teams to easily document, classify, track, report, manage, and mitigate their risks in a collaborative web environment. Composite risk rollup views, 23 standard risk reports, ad hoc report capability, and customizable Risk Cube, drop down menus, and up to 14 risk triggers with automatic email notifications all work together to help your team manage and mitigate your project risk.
