AMERICAN SYSTEMS adds new Health IT Special Item Number (SIN) to its General Services Administration (GSA) Schedule 70

Company is first to offer healthcare IT services under new SIN

August 1, 2016 — Chantilly, VA — AMERICAN SYSTEMS today announced it received a modification from the U.S. General Services Administration (GSA) adding the new Health IT Special Item Number (SIN) 132-56 to the company's existing IT Schedule 70 (GS-35F-500CA). The Health IT SIN was developed by GSA to assist federal customer agencies in finding IT expertise that meets their highly specialized requirements. This new SIN will pull together offerings from across the health IT spectrum including areas such as health analytics, innovative health IT solutions, and health informatics.

As a growing provider of federal healthcare IT services, this was an important SIN for AMERICAN SYSTEMS to obtain. As the healthcare market continues to grow at a rapid pace, this SIN will offer government Contracting Officers the ability to acquire healthcare technology services quickly and efficiently via GSA Schedule 70.

"AMERICAN SYSTEMS is proud to be able to market our services under the new Health IT SIN for Schedule 70," said Peter Smith, President and CEO of AMERICAN SYSTEMS. "With a focus on defense health and operational medicine, this will help us meet the future healthcare IT needs of our country by providing easy access to our Healthcare IT services,"

About AMERICAN SYSTEMS

Founded in 1975, AMERICAN SYSTEMS is a government IT solutions provider and one of the top 100 employee-owned companies in the United States, with approximately 1,400 employees nationwide. Based in the Washington, D.C., suburb of Chantilly, Va., the company provides advanced systems and network infrastructure engineering, technical, and managed services to DOD, Intel, and civilian government customers.
